

Partnership with HOTEL INC

HOTEL INC believes an individual can live their best life when they are as independent as possible. Still, we understand that there are roadblocks and systems that prevent people from moving forward by keeping them dependent on resources and services. Through the years HOTEL INC has learned the importance of walking with individuals who have come through our doors, especially those who have expressed their readiness to move from dependence on community services and work towards personal independence. We feel that partnership with each individual, to help support them during this transition, is the healthiest way to ensure each person's success. Our participants have shared with us how much they value this partnership. Getting to know each person's story helps us to understand their specific gifts, needs and goals while supporting them as they assess how their housing, health, and nutrition impacts their ability to thrive.

What to expect:

- Regular navigation (weekly or bi-weekly) as agreed upon by the participant and the navigator. HOTEL INC will commit to providing a navigator during these 1-on-1 meetings and ask that a participant commit to being present for all of the meetings.
- If the participant must reschedule or miss an appointment more than twice, then they will be asked to reapply for partnership with a pre-application. If pre-applications are closed due to a long waitlist, participants will have to wait for them to reopen before reapplying.
- Assessments to help a participant identify needs in the areas of health, housing, and nutrition.
- The formation of a personal case plan, developed by the participant, with specific goals to address health, housing, and nutrition needs.
- A clear timeline for partnership will be decided upon by the participant and the navigator to work on the participant's goals.

Health/Street Outreach:

- Complete review of participant's health needs (chronic health conditions, healthcare costs, medication costs, etc) to assist participants with evaluating how their health needs might be impacting their housing and nutrition needs.
- Medication Assistance (if eligible)
- Connecting participants to a physician/insurance provider if needed
- Basic Medical Care and vital checks provided by volunteer medical professionals during medical street rounds.

Housing:

- Assessment of past housing history and current housing needs.
- Connection to community resources helping to remove obstacles to stable housing
- Access to educational programming and housing support specific to participant's housing needs and goals.
- Aftercare: On-going navigation after a participant has been housed to help the participant feel confident in their ability to experience housing success. (Aftercare can last for up to 1 year).

Nutrition:

- Assessment of current nutritional needs and food availability
- Creation of meal plans
- Review of budget
- Nutritional education specific to participant's medical needs and goals
- Access to fresh food, produce, and supplemental pantry basics dependant on goals and plan developed by the participant and agreed upon by their navigator
- The opportunity to participate in the West End Co-op and purchase fresh produce and foods

Partnership with HOTEL INC (Pre-Application for Partnership)

Intake/Assessments/Discussions help determine the participant's goals and what resources from HOTEL INC would support them during their journey

Participant works with the navigator to determine the needed timeline for partnership and what would determine success and transition for the participant

Ongoing Navigation/Participation in classes/resources

Participant feels ready to transition in the partnership and progress towards stability in their health, housing, and nutrition needs.

Participant and navigator both acknowledge the partnership agreement.
